INSIGHTS

- Electronics category drives the highest overall sales
- Furniture category shows stronger and more stable profit margins
- Smartphones, Monitors, and Laptops are the top revenue-generating products
- Cabinets and Office Desks deliver consistently high profit
- Quantity patterns show most orders fall between 1–3 units
- Regional performance is balanced, with slight dominance in South & East
- No major data gaps or anomalies after cleaning
- Profit distribution aligns closely with product category strength

RECOMMENDATIONS

- Prioritize Electronics for revenue growth initiatives
- Expand Furniture category due to strong profitability
- Promote high-margin products like Cabinets and Office Desks
- Introduce bundle offers for Smartphones and Laptops
- Optimize inventory for products frequently ordered in higher quantities
- Strengthen regional targeting in South and East
- Use cleaned data to refine forecasting and pricing models
- Monitor product-level profitability to maintain margin stability
